

ECUTUNED HQ
VagCom (VCDS) Log Assistance

VAG 1.6TDI & 2.0TDI DCM6.2 ECUs

When logging using the Advanced Measuring Block function please check the Group UDS box and click on Turbo

"Engine Speed (RPM)"

"Vehicle Speed (km/s)"

"Charge air pressure specified value"

"Charge pressure before throttle valve: calculated actual value"

"Mean injection quantity"

"Engine Torq (nm)" / Torq Limitation (nm)

"Exhaust gas temperature sensor 1"

"Coolant temperature"

Engine torque can't be monitored some vehicles only let you monitor calculated Torque (Limitation: Torque) which doesn't give a actual value.
